

Project : Installation Gauddi software on Philips Q-line display
Version : 1
Date : 23-4-2018

Step 1: Setup your Philips Android Q-line display

Necessities:

- USB-stick (8GB+)
- USB-keyboard
- Internet connection (preferably wired, otherwise WiFi)

Prepare USB

1. Go to <https://get.gauddi.com/philips/install/q-line.zip> and **download the file**.
2. Extract the files from the downloaded zip to the USB device (filesystem FAT, minimal 8GB).
3. Make sure the files are exported to the following path:
<usb drive>\philips\app\installer-vX.X.X.apk (X is variabel)
4. Optionally: add Android firmwares to <usb drive>\firmware\<version>.zip
5. Plug the USB stick into the Philips display.

Prepare Device

6. Pull out the **remote-control sensor** at the back of the display.
7. To begin with the setup, use the remote to turn on the Philips display wait for it to fully power on. If the device starts a wizard, you can continue to **Device First Use**, otherwise you continue the manual at **Factory Reset**.

Factory reset

8. Press **Home** and immediately afterwards **1 9 9 9 back** .
9. Select **Factory Reset**. Choose **OK** to start the Factory Reset. The display will automatically turn off after 10 seconds. Turn the screen back on with the remote control. If the factory reset was successful you will end up in the 'Welcome' screen.

Device First Use

10. Language Settings Menu: select your preferred language and press **Start**.
11. Network type: **Select Ethernet** and press **Next** (It's preferable to use a wired connection).
12. Network settings: **Select enable** under Main Switch.
13. Signage display settings: **Import Signage Display Settings from USB** and press **Next**.
14. Clone media files into internal: **Press Skip**
15. Setup completed: **Press Finish**

Device Configuration

16. Go to the Main Menu: press **Home** and immediately afterwards **1 8 8 8**.
17. Open **Settings** and select **Date & Time**, then open **Select time zone** and **Select your current timezone** and press **OK**.
18. Go back to **Signage Display** in the left menu. Open **Custom App** and then **Select App**. Select **Gauddi** and press **Save**.
19. Press **Home** and navigate to **Configuration1**. In the right menu, open **Boot on source** and select input **Custom**. Press **Save** to confirm.
20. Go to **Advanced option**, open **Power Save** and select **Mode1**.
21. Please turn the display off and then (after about 10 seconds) back on. The Gauddi installer will start automatically after around 10 to 20 seconds.

Step 2: Connect your Philips display with the Gaudi license

Before you can connect to Gaudi CMS, you will need to carry out the two previous steps. Finally, you connect your display to Gaudi CMS. How to do this check out the two options.

Open cms.gaudi.com (option 1)

1. Open a browser on your phone or desktop computer and head to cms.gaudi.com. Login using your credentials.
2. Go to the top right corner and click register player. Enter the registration code, this is the 8-digit number on the Philips display. Give your display a name.
3. Press register. Your display will automatically connect with the Gaudi cms.
4. You can start creating and scheduling professional-quality campaigns. Need help? Watch our [How-To-Video on how to create Campaigns & Playlists](#).

Received a code from Gaudi (option 2)

1. Please make sure you see an 8-digit number on the Philips display. Press **8, 8, 8, 8** on the remote.
2. Now you can enter the code you have received from Gaudi. After entering, press **“OK”**. The system will confirm that the Philips display is registered to the Gaudi CMS.
3. Open a browser on your phone or desktop computer and head to cms.gaudi.com. Login using your credentials.
4. You can start creating and scheduling professional-quality campaigns. Need help? Watch our [How-To-Video on how to create Campaigns & Playlists](#).
