

Project : Factory Reset on a LG webOS 4.0 display
Version : 1
Date : 12-11-2018

Factory Reset for LG webOS 4.0

1. Before installation of the Gaudi software you should check if the monitor is ready. You can easily do this by turning the monitor on. After a few seconds you should see the **Ready to use menu**. If your monitor doesn't boot to this menu you should perform a **Factory Reset**.
2. Press the **Settings** button to open the settings menu and select the **Admin** option. Press ok to to turn the switch to **on**. Enter the **pincode** (default is 000000).
3. The admin options should be enabled. Scroll all the way down till you see the **Factory Reset button**. Click **OK**.
4. Click **Confirm** and the monitor will reset and power off.
5. Turn the monitor back on. You should now end up in the **Ready to use menu**.
6. Please proceed with the setup op your LG webOS 4.0 display and the installation of the Gaudi software.
