

Project : Installation Gaudi software on LG webOS 2.0 monitor
Version : 3
Date : 27-6-2017

Step 2: Installation Gaudi software on LG webOS monitor

Before installation of the Gaudi software you must have completed the first step (Setup your LG webOS monitor). Once you've done that you are ready to carry out the next step.

Download Gaudi Software

1. Press and hold the **Settings** button on the remote control until a small box with a chat bubble icon appears in the top-right corner.
2. Once you can see the chat bubble icon, please press quickly the following **8, 0, 8, 0** and **OK** key sequence on your remote control, to open the **Server Settings** menu.
3. In the Server Settings menu, please set the following options:
 - a. Set the **Application Launch Mode** to **Local**.
 - b. Set the **Fully Qualified Domain Name** to **On**.
 - c. Set the **URL** to be: **https://get.gaudi.com/lgapp/lgapp.zip**
4. Next to the Local Application Upgrade option, please select the **Remote** option. and then confirm to begin the application install process on to your LG monitor.
5. After a short time a message will appear on the monitor confirming that the Gaudi for LG webOS client installation has been successfully.
6. Please turn the monitor off and then (after 10 seconds) back on and Gaudi will start automatically after around 10 to 20 seconds.
7. The LG monitor will check if the correct firmware is installed. If not, it will ask to download and update the firmware. The firmware size is 450-600mb. The download time depends on your internet connection. Press **OK** to continue.
8. Congratulations! You have now successfully configured your LG monitor with Gaudi. You only need to connect your monitor with Gaudi CMS. To do this, please go to third and last step.

Step 3: Connect your LG webOS monitor with the Gaudi license

Before you can connect to Gaudi CMS, you will need to carry out two previous steps: the first one is setup your LG webOS monitor and the second one is to install the Gaudi software on your monitor. Finally you connect your monitor to Gaudi CMS. How to do this check out the two options.

Open cms.gauddi.com (option 1)

1. Open a browser on your phone or desktop computer and head to cms.gauddi.com. Login using your credentials.
2. Go to the top right corner and click register player. Enter the registration code, this is the 8 digit number on the LG monitor. Give your monitor a name.
3. Press register. Your monitor will automatically connect with the Gaudi cms.
4. You can start creating and scheduling professional-quality campaigns. Need help? Watch our [How-To-Video on how to create Campaigns & Playlists](#).

Received a code from Gaudi (option 2)

1. Please make sure you see an 8 digit number on the LG monitor. Press **8, 8, 8, 8** on the remote.
2. Now you can enter the code you have received from Gaudi. After entering, press "OK". The system will confirm that the LG monitor is registered to the Gaudi CMS.
3. Open a browser on your phone or desktop computer and head to cms.gauddi.com. Login using your credentials.
4. You can start creating and scheduling professional-quality campaigns. Need help? Watch our [How-To-Video on how to create Campaigns & Playlists](#).
