**Factory Reset**

1. Before installation of the Gauddi software you should check if the monitor is ready. You can easily do this by turning the monitor on. After a few seconds you should see the **Language Selection menu**. If your monitor doesn't boot to this menu you should perform a **Factory Reset**.
2. Open the **Settings menu** by pressing and holding the settings button until a small box with a chat bubble icon appears in the top right corner, press quickly **0,0,0,0** and **OK**.
3. Press on the **arrow right button** and open **Signage Setup**. Scroll all the way down till you see the **Factory Reset button**. Click **OK**.

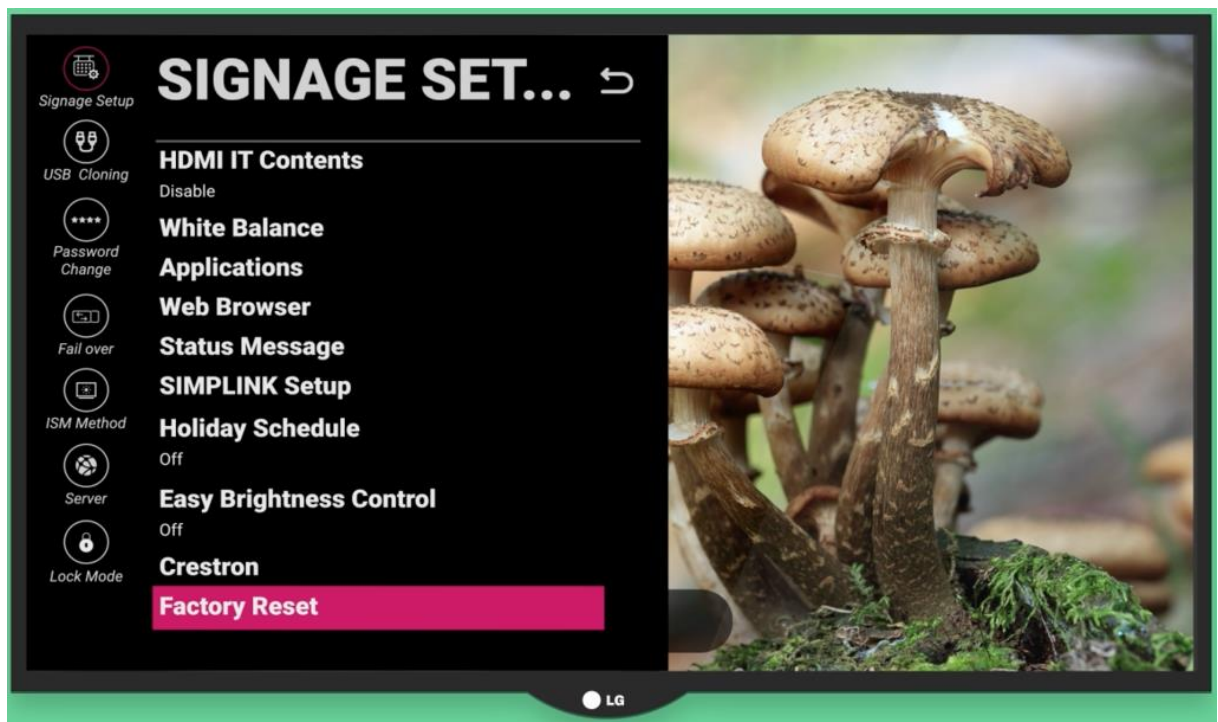

4. Click **Confirm** and the monitor will reset and power off.
5. Turn the monitor back on. You should now end up in the **Language Settings menu**.
6. Please proceed with the setup op your LG webOS monitor and the installation of the Gauddi software.
