

Project : Installation Gauddi software on LG webOS 3.2 monitor  
Version : 2  
Date : 12-11-2018

## Step 1: Setup your LG webOS 3.2 scherm

If this is the first time you use the LG webOS monitor, you will need to carry out the following steps.

### Turn on your monitor

1. To begin with the setup use the remote to turn on the LG monitor wait for it to fully power on.
  - a. After a few seconds you should see the Ready to Use menu, select **Go to Settings** and press **Start**.
  - b. If your monitor doesn't boot to this menu you should perform a **Factory Reset**. How to do this, you can read in the tutorial: **Factory Reset webOS 3.2**.
2. Select the **General** option in the **Settings Menu**. Go to the **Date & Time** option. Enable **Set Automatically**. Go to the **Timezone** option and select the correct **Continent, Country** and **City**.
3. Set you **Internet Connection**. It is preferable to use a wired network connection. Use the **Network** option in the **Settings Menu** to setup a WiFi connection or adjust network settings.
4. Congratulations! Your LG webOS monitor is now ready for the Gauddi software. To do this please go to the next step.

## Step 2: Installation Gauddi software on LG webOS 3.2 monitor

Before installation of the Gauddi software you must have completed the first step (Setup your LG webOS monitor). Once you've done that you are ready to carry out the next step.

1. Press the settings button and select the **Ez Settings** option. Select the purple icon called **SI Server Settings**.
2. In the SI Server Settings menu, please set the following options:
  - a. Set the **Fully Qualified Domain Name** to **On**.
  - b. Set the **URL** to be: **<https://get.gauddi.com/lgapp/lgapp.zip>**
  - c. Set the **Application Launch Mode** to **Local**.
3. Next to the Local Application Upgrade option, please select the **Remote** option, and then confirm to begin the application install process on to your LG monitor.
4. After a short time a message will appear on the monitor confirming that the Gauddi software for LG webOS client installation has been successfully installed.
5. Please turn the monitor off and then (after 10 seconds) back on and Gauddi will start automatically after around 10 to 20 seconds.
6. The LG monitor will check if the correct firmware is installed. If not, it will ask to download and update the firmware. The firmware size is 450-600mb. The download time depends on your internet connection. Press **OK** to continue.
7. Congratulations! You have now successfully configured your LG monitor with Gauddi. You only need to connect your monitor with Gauddi CMS. To do this, please go to third and last step.

### Step 3: Connect your LG webOS monitor with the Gauddi license

Before you can connect to Gauddi CMS, you will need to carry out two previous steps: the first one is setup your LG webOS monitor and the second one is to install the Gauddi software on your monitor. Finally you connect your monitor to Gauddi CMS.

#### Open [cms.gauddi.com](https://cms.gauddi.com) (option 1)

1. Prior to this installation you purchased a license.
2. Open a browser on your phone or desktop computer and head to [cms.gauddi.com](https://cms.gauddi.com). Login using your credentials.
3. Go to the top right corner and click **register player**. Enter the registration code, this is the 8 digit number on the LG monitor. Give your monitor a name.
4. Press **register**. Your monitor will automatically connect with the Gauddi cms.
5. You can start creating and scheduling professional-quality campaigns. Need help? Watch our [How-To-Video on how to create Campaigns & Playlists](#).

#### Received a code from Gauddi (option 2)

1. Please make sure you see an 8 digit number on the LG monitor. Press **8, 8, 8, 8** on the remote.
2. Now you can enter the code you have received from Gauddi. After entering, press “OK”. The system will confirm that the LG monitor is registered to the Gauddi CMS.
3. Open a browser on your phone or desktop computer and head to [cms.gauddi.com](https://cms.gauddi.com). Login using your credentials.
4. You can start creating and scheduling professional-quality campaigns. Need help? Watch our [How-To-Video on how to create Campaigns & Playlists](#).
